**B Explanatory Notes as required by the BMSB Revised Listing Requirements**

**B1. Review of Performance**

For the current quarter under review, the Group's pre-tax profit surged 98.4% to RM340.3 million compared to the same quarter last year. Plantation profits increased significantly, boosted by higher commodity prices as well as higher FFB crop. Performance from the manufacturing sector, particularly the Oleochemical Group, had also improved. An allowance was made for the diminution in value of an overseas quoted investment.

The half year profit before taxation of the Group at RM712.9 million had exceeded that of the corresponding period by 94.9%. Contribution from plantation sector rose sharply which was achieved through strong commodity prices and increase in FFB crop. Manufacturing sector had also brought in higher earnings.

The Group's 2 quarters pre-tax profit fell 8.7% to RM1340.3 million compared to the preceding quarter. Plantation profits continued to improve, benefitting from buoyant commodity prices. However, the retailing sector's seasonal loss and the allowance for diminution in value of an overseas quoted investment accounted for the lower profit.

**B3. Current Year Prospects**

The Directors are of the opinion that the Group's profit for the current financial year would substantially exceed that of the previous year in view of the prevailing strong commodity prices, increase in FFB crop and higher contribution from the manufacturing sector.

**B4. Profit Forecast and Profit Guarantee**

The Group did not issue any profit forecast or profit guarantee during the current financial year to-date.
